# Preface

## Purpose of this Document

The Software Suite Guide provides the procedures and information necessary to use Version 6.9 of the Access Control System. These procedures guide you to use the following groups of functions:

Badging

Hardware configuration

Database configuration

Monitoring

Reporting

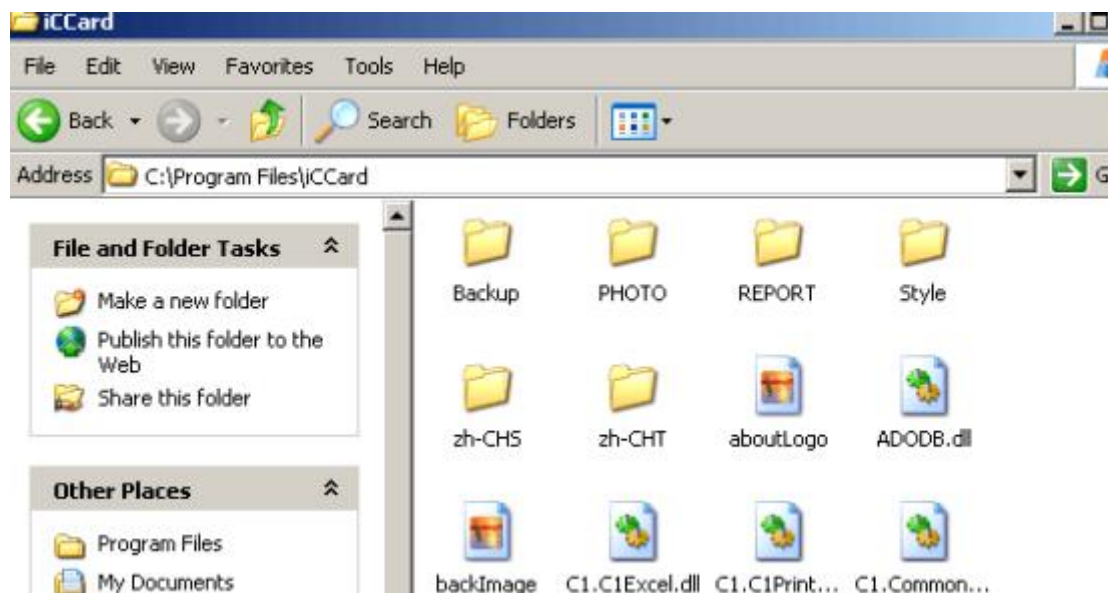

Administration

## Audience

This direction is written for two kind of readers .Part 1 is opened for actual operation Access Control System's user,such as security personnel .Part 2 is opened for an administrator who first configures the system.

# Part 1 Setup and Remove applications

## 1.1 Setup applications

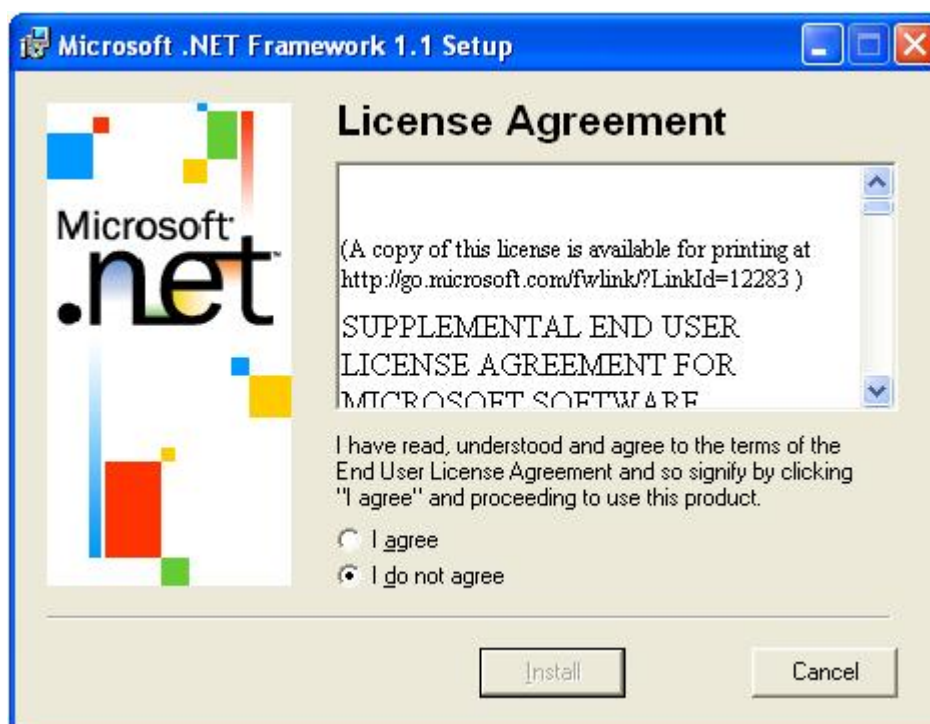

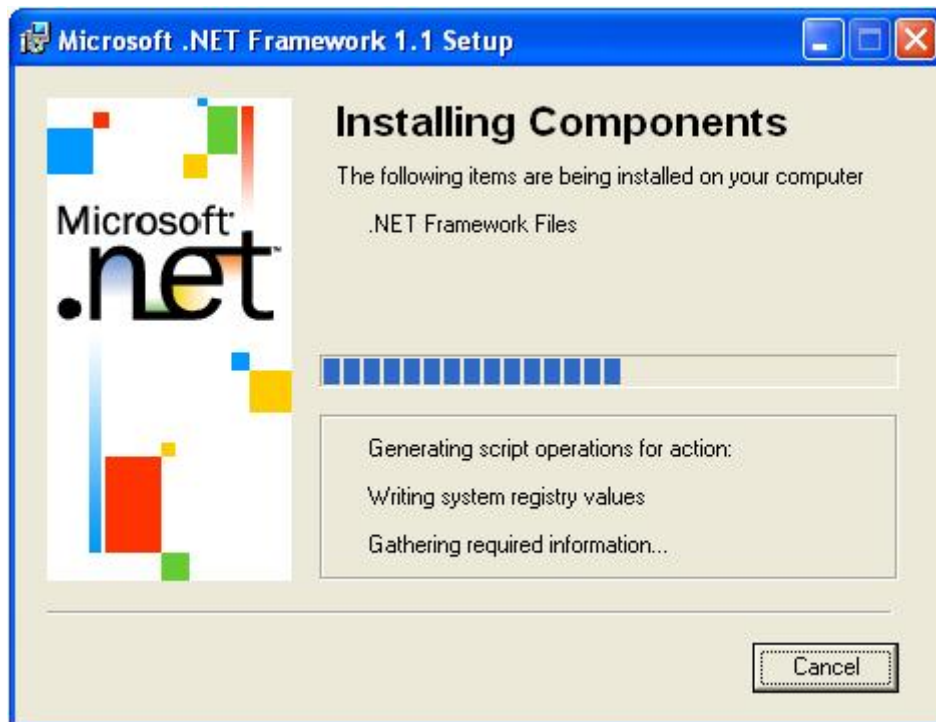

First puts in the CD to CD-ROM, then run the applications of setup (  ).

### 1.1.1 Setup Microsoft.Net

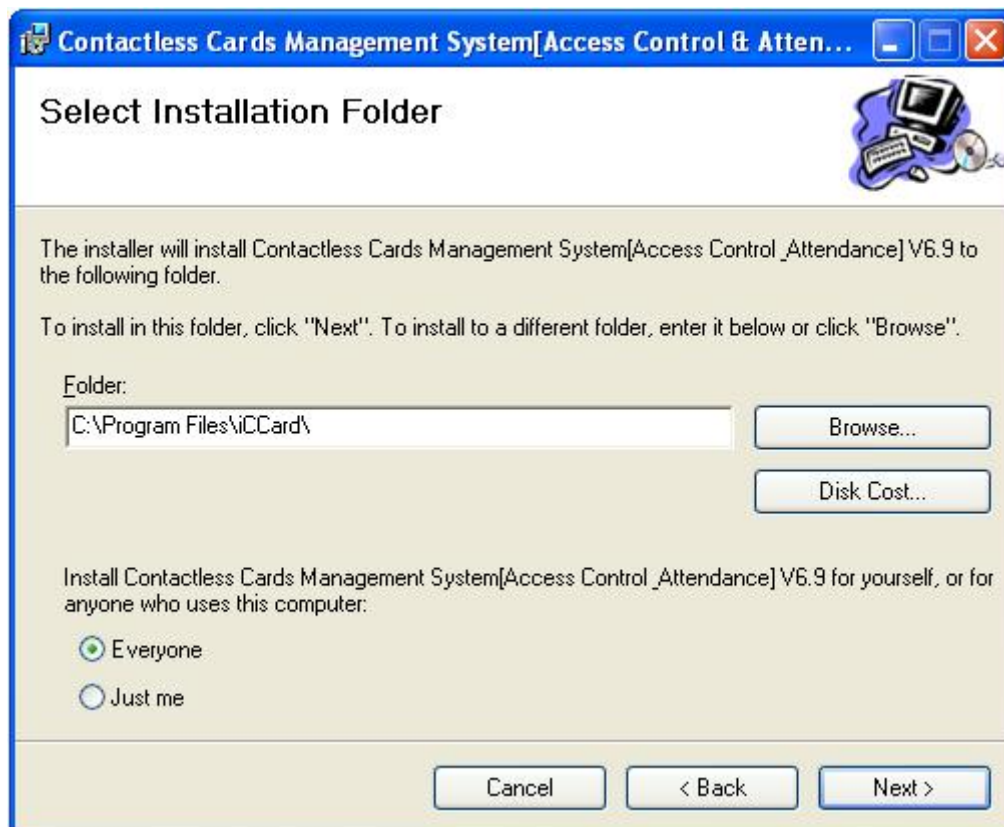

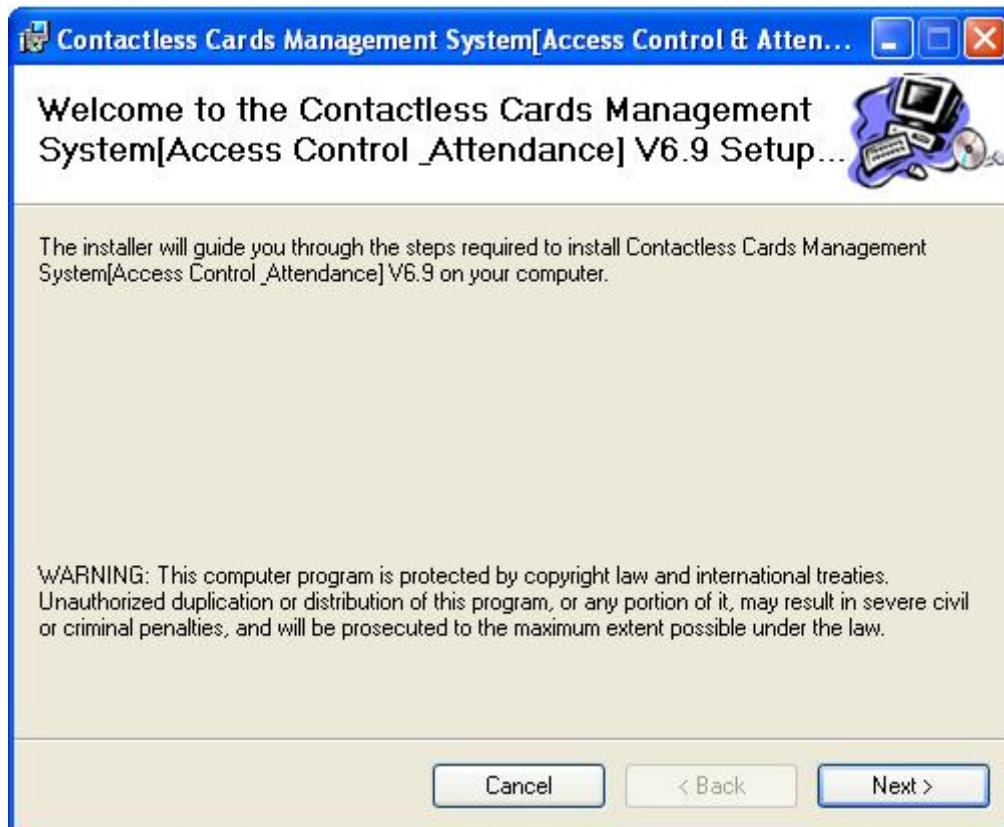

When in your computer has not installed **Microsoft.NET Framework**, The system can from next step for you to install **Microsoft.NET Framework 1.1**.

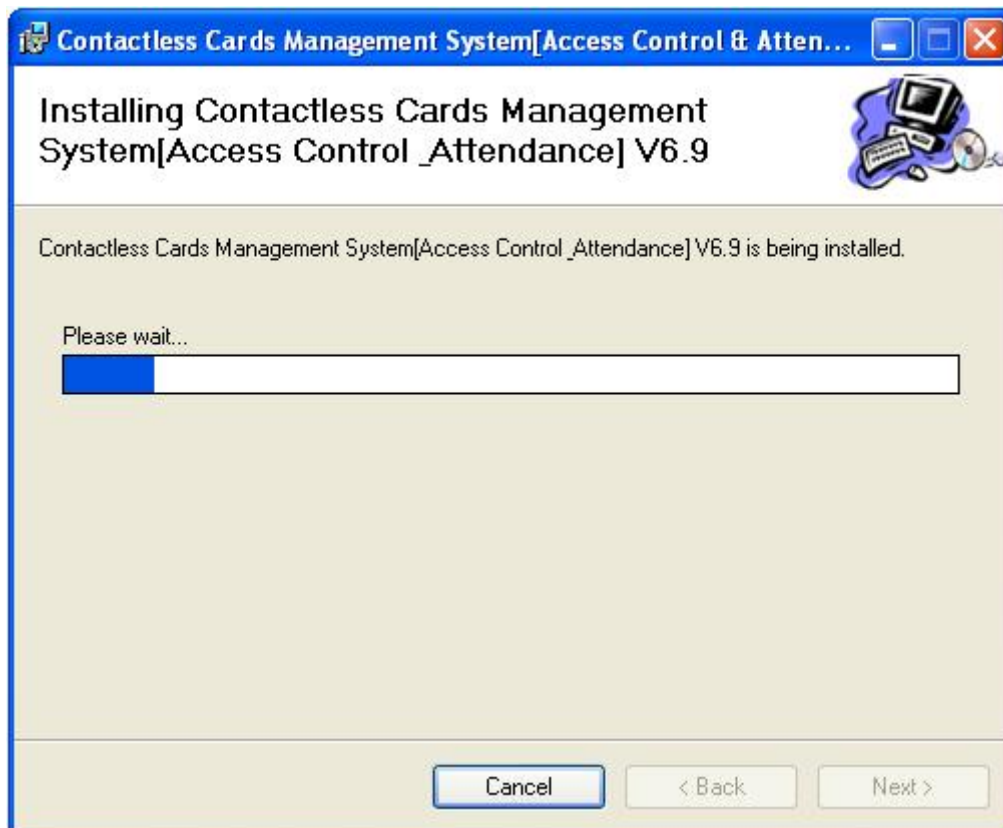

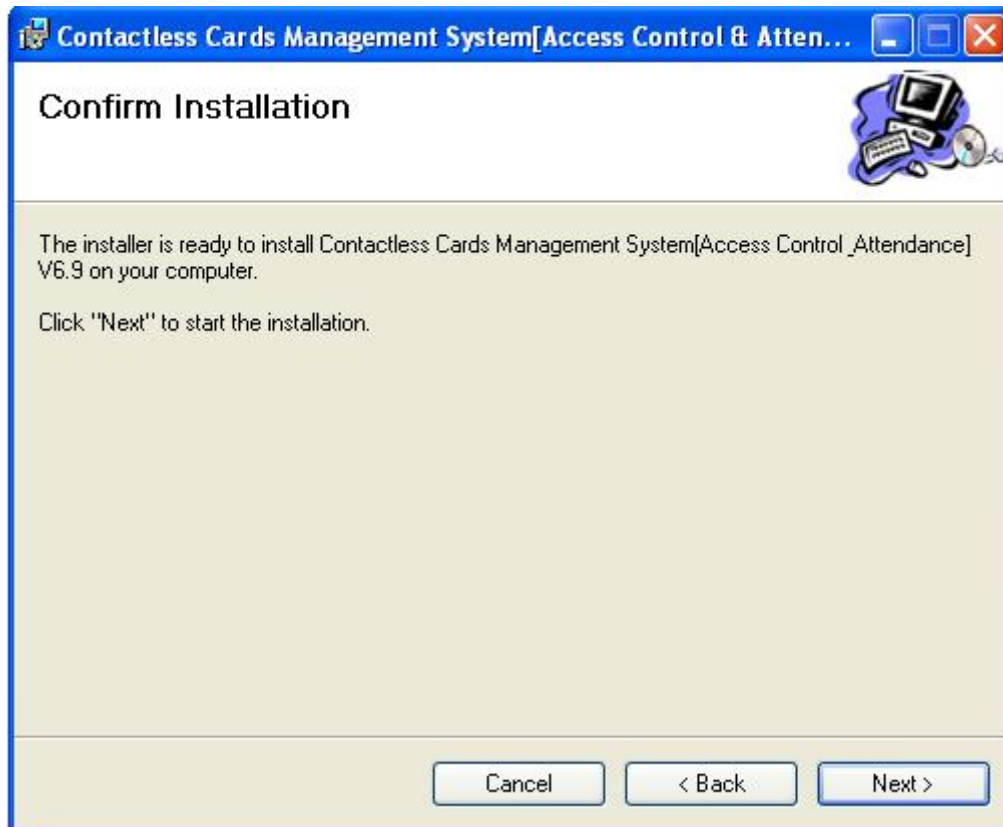

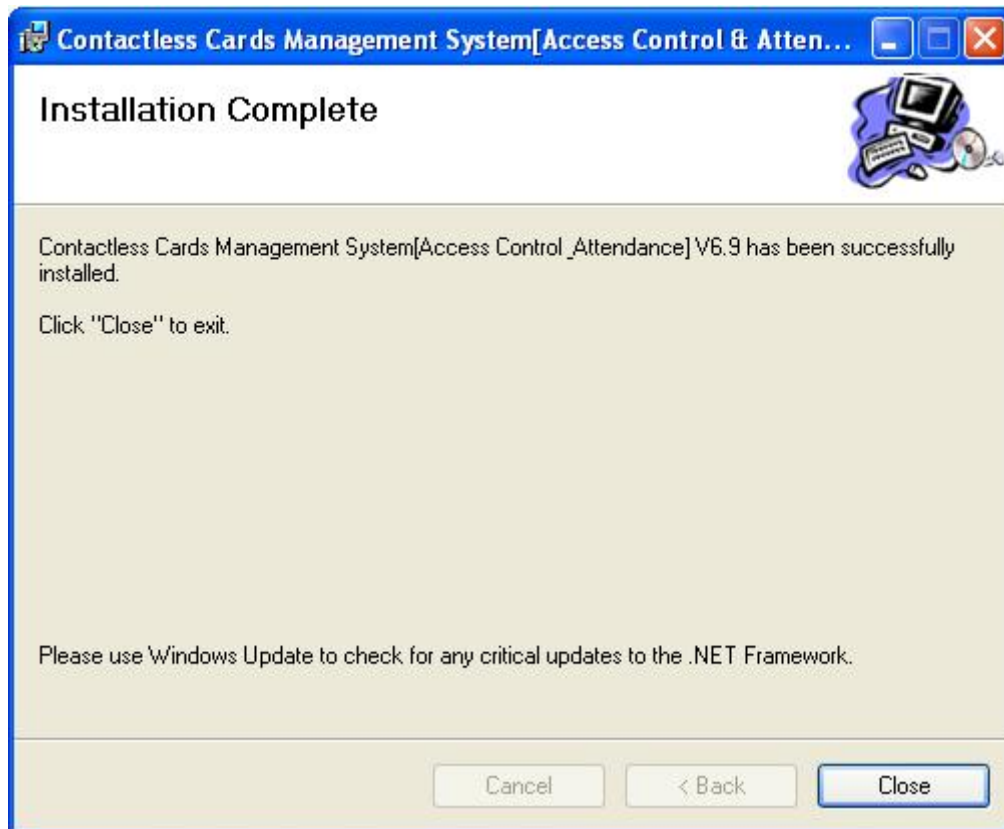

If your computer has installed **Microsoft.NET Framework**, The system will from next step for you to install Access Control System.

## 1.1.2 Setup Access Control software

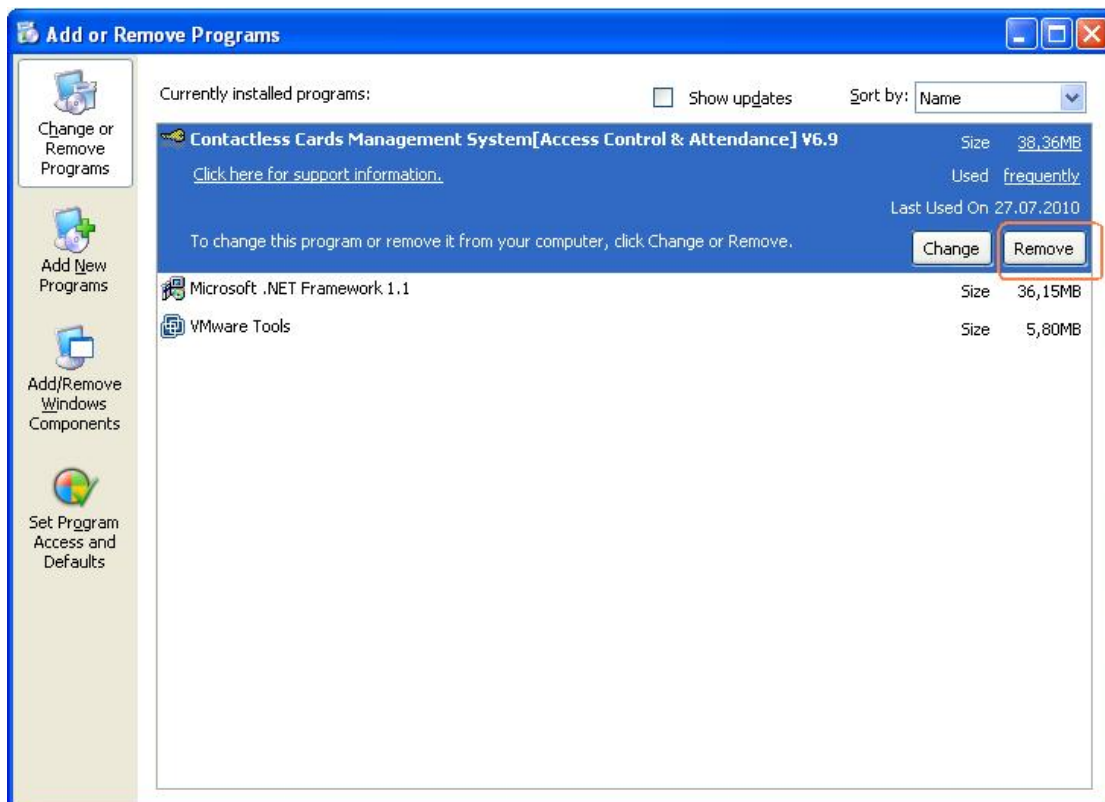

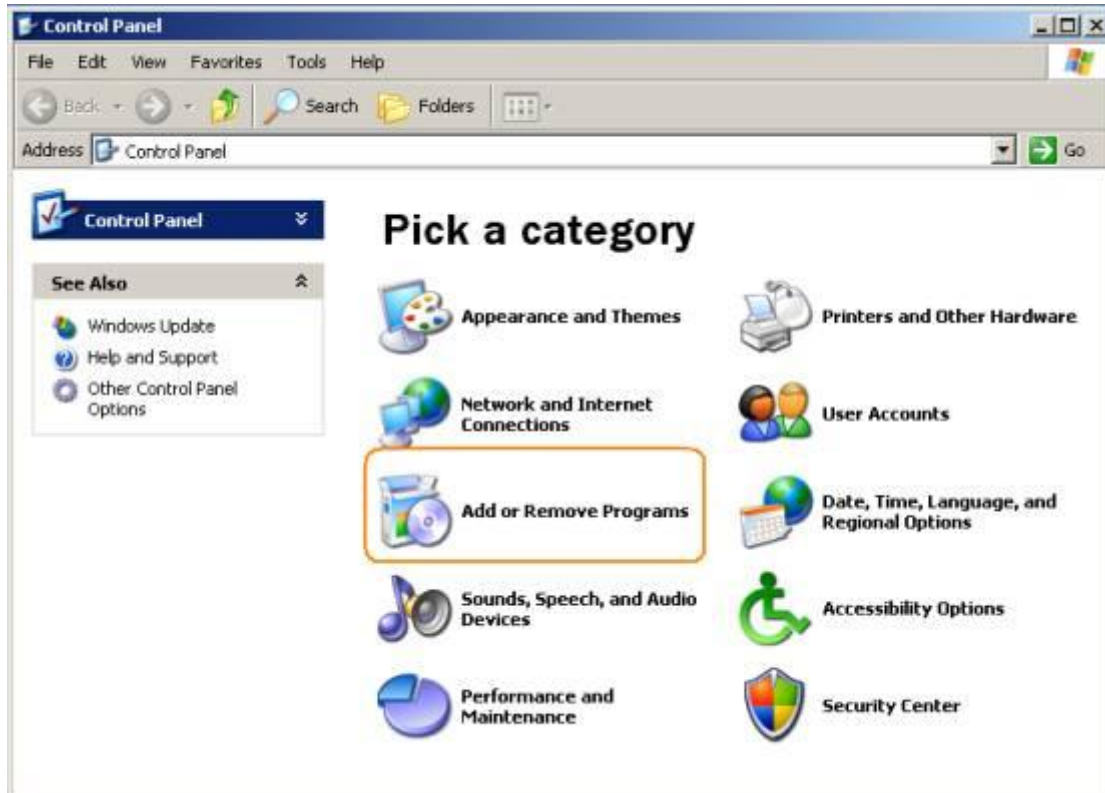

After the installment completes, the desktop automatically will create、

## 1.2 Remove applications

## Part 2 Login

Click the Management Center V6.9 or run All Programs << iCCard << Access Control & Attendance V6.9.

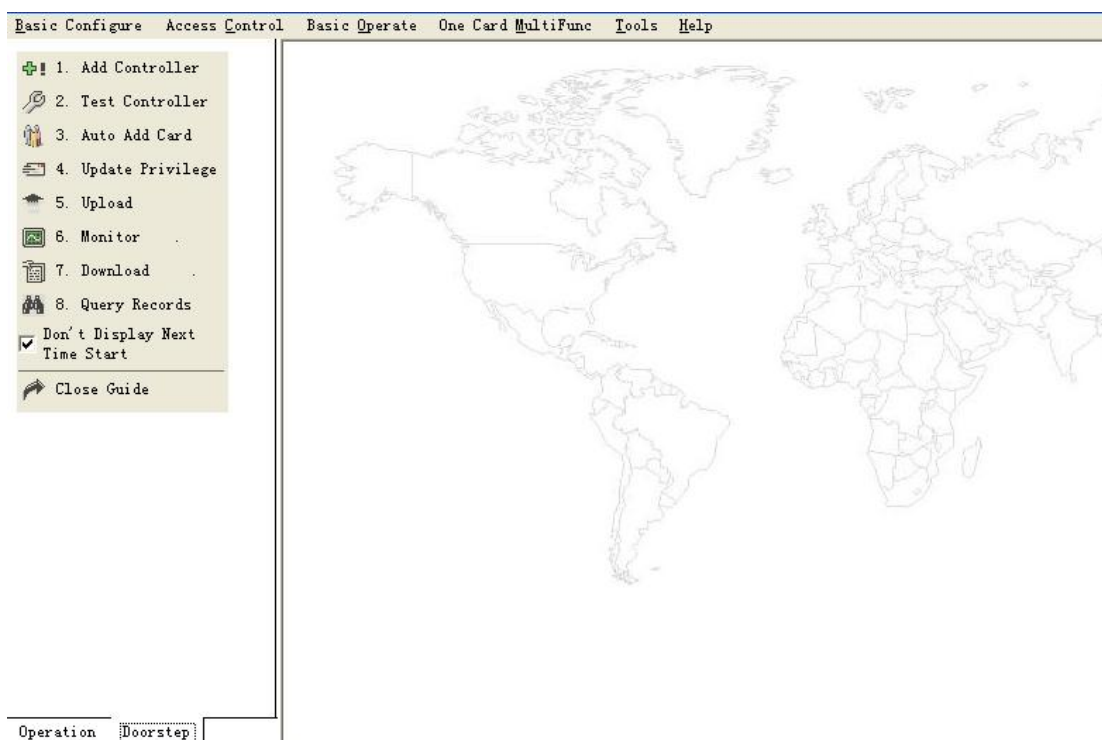

It will open up the Login windows .As follows:

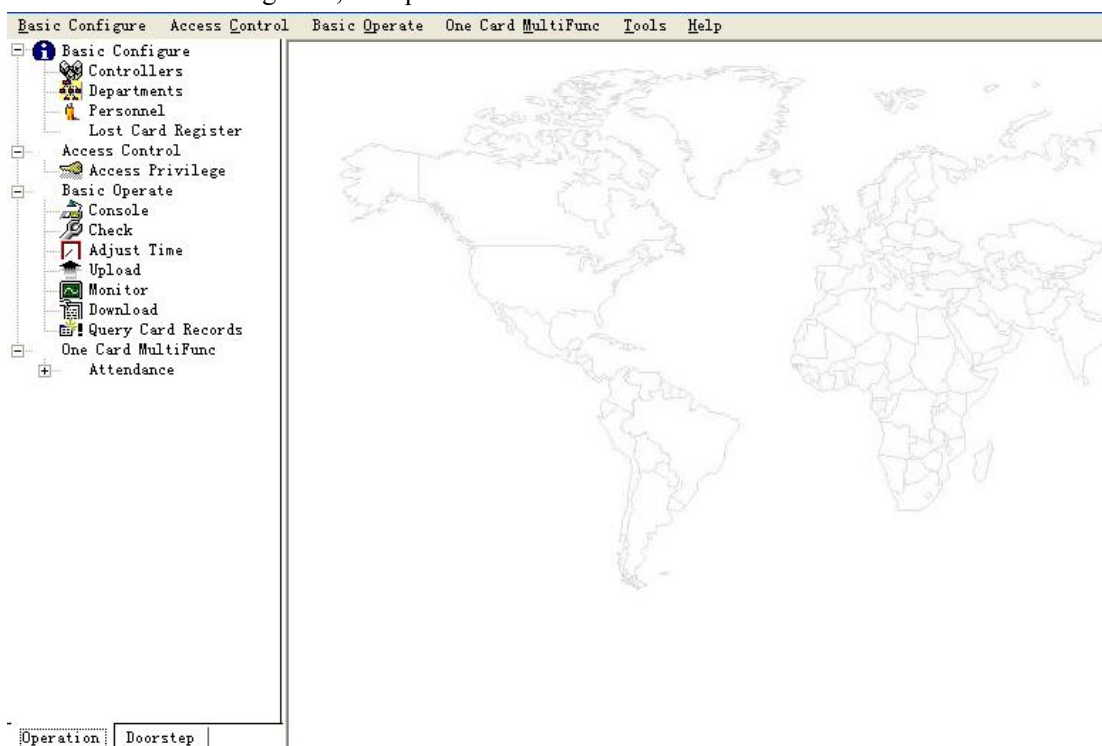

By default, the user name required is “ abc ”, the password required is “123”. It is recommend to change the name and password at the first use.

After login , It will show the main windows . as follows:

At you first login ,it will shows a basic guide. If you do not have the experience, you may complete the basic operation and the establishment under this guide's direction. But, we suggested that you'd better close the basic guide ,at the same time you should read the manual carefully to familiar with the operation of software.

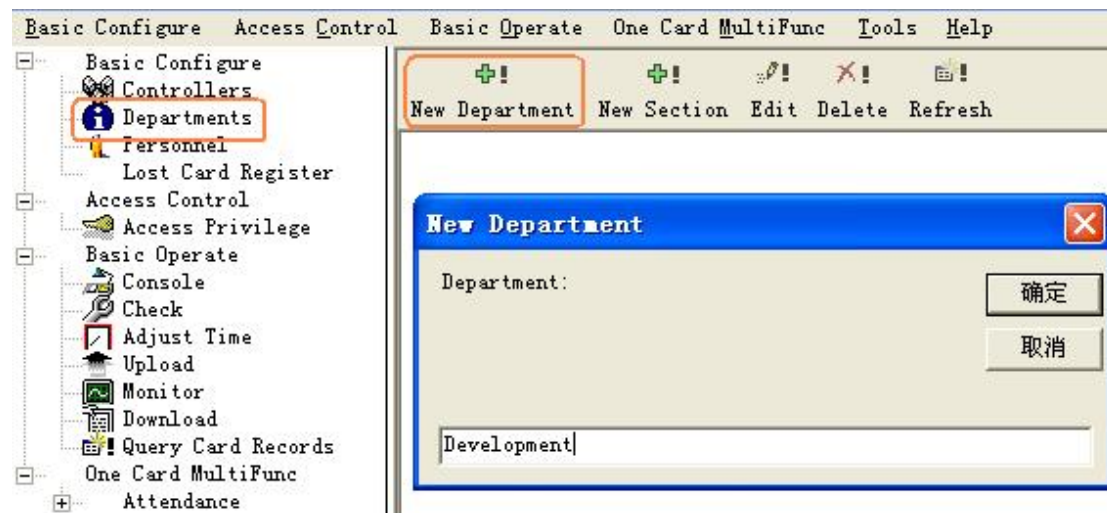

After close the " basic guide", the operation windows as follows.

## Part 3 Adding and Editing Basic Configure

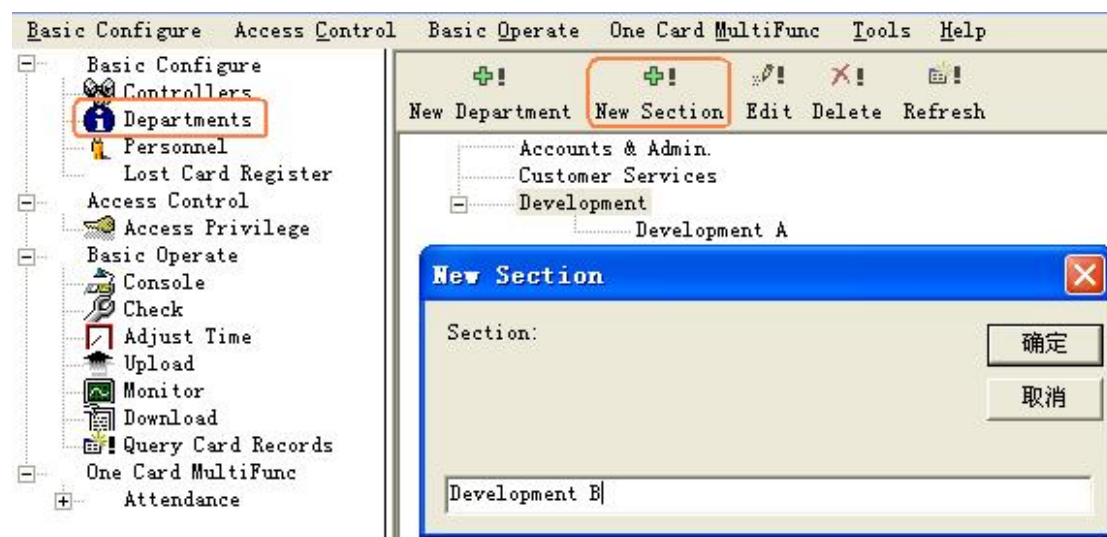

### 3.1 Add Department

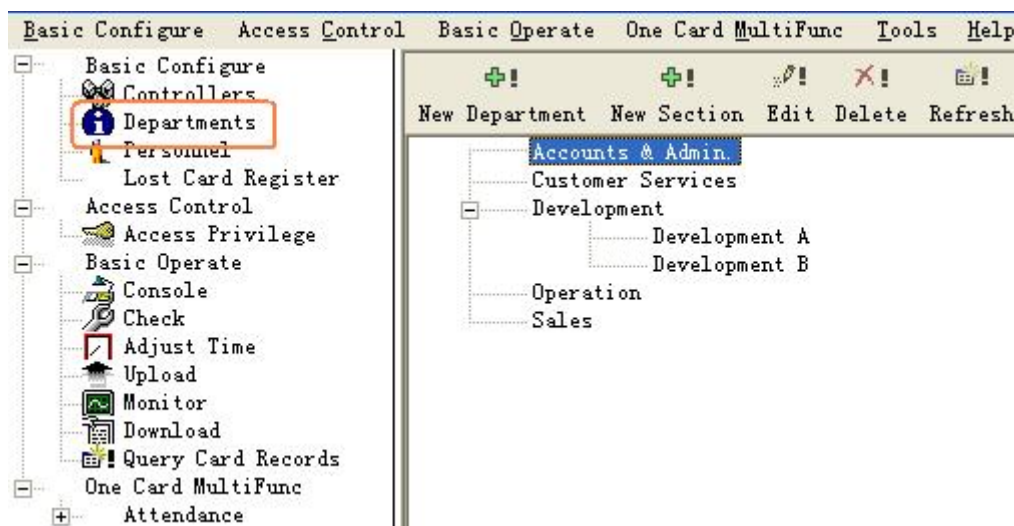

Select **Basic Configure > Departments** from the menu bar

click the  New Department to create a new department.

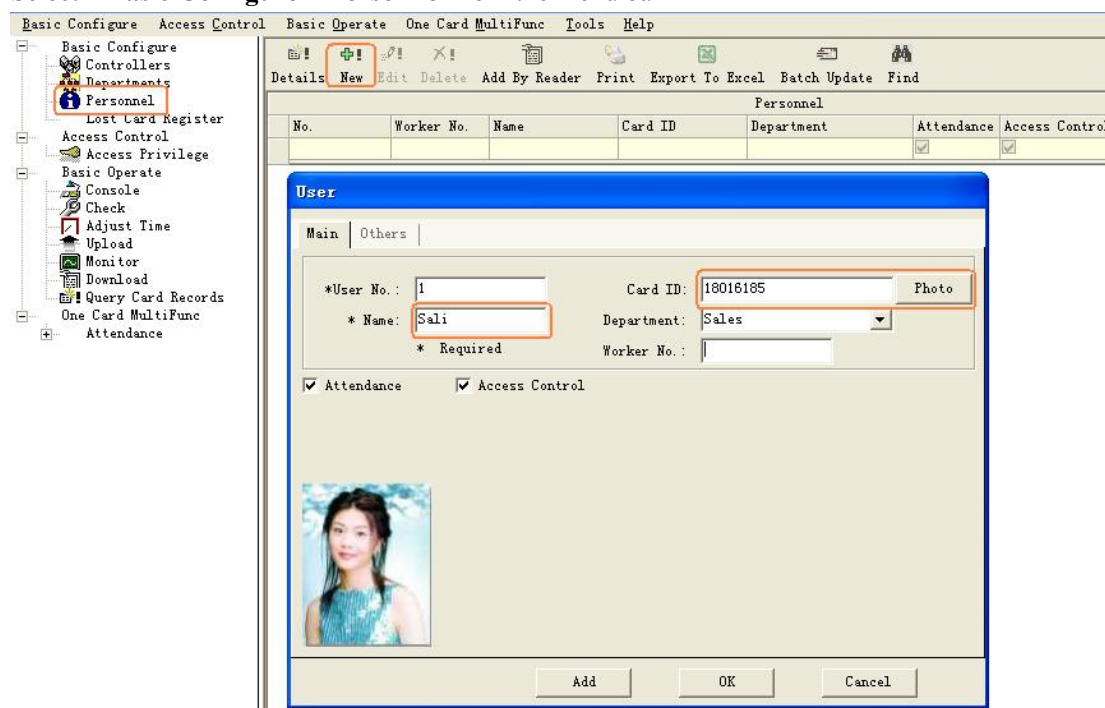

Click the  New Section to add a new section under a department.

## 3.2 Add and Edit a Personnel

Select **Basic Configure > Personnel** from the menu bar

Add

After you input all information about the user, click this button, the system had add a user .At the same time ,it will remain show the **user windows** and wait for you input the next user's information .

					✓	✓

If you want to use Excel importing customer's information, please edit the document of userinfo.xls first., the userinfo.xls document is located on the control at gate manages software (C:\Program Files\iCCard),showing as this:

	A	B	C	D
	Worker No.	Name	Card ID	Department
2	05-A01	Tina	100	MISDEV
3	08-b56	John	259856	Purchase department
4	AA-01	Steven	45896	Technique department
5				

**Remark:** The card number must be more than three numbers, department and section can with "\" for box off a sign. For example: MISDEV

Import customer's information from Excel was successfully, information hints, click an assurance .

## Part 4 Access Control

### 4.1 Configuration

Your organization can prevent material or information robbery, by limiting / supervising the access to all or part of your facility (lab, computer room, or storage areas) to authorized persons, during specific time periods.

Smart multi-technology controllers, linked to advance identification systems, are programmed to control "who is going where and when". Each person is equipped with a personalised card or another ID that controls access.

When a badge holder needs permission to access a particular area, the information is relayed from the reader to the controller. The controller either grants or refuses access according to the parameters defined (access authorization, time zones, etc.) The operations are then sent to the PC and listed in the backlog and the journal.

Access control parameters are mainly defined in the "Parameter" section of the application.

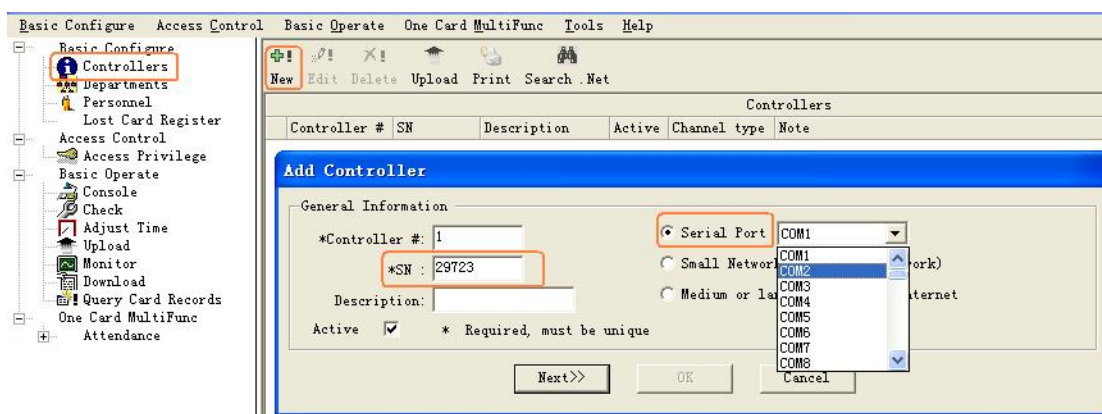

#### 4.1.1 Hardware Configure

Select **Basic Configure << Controllers** from the menu bar

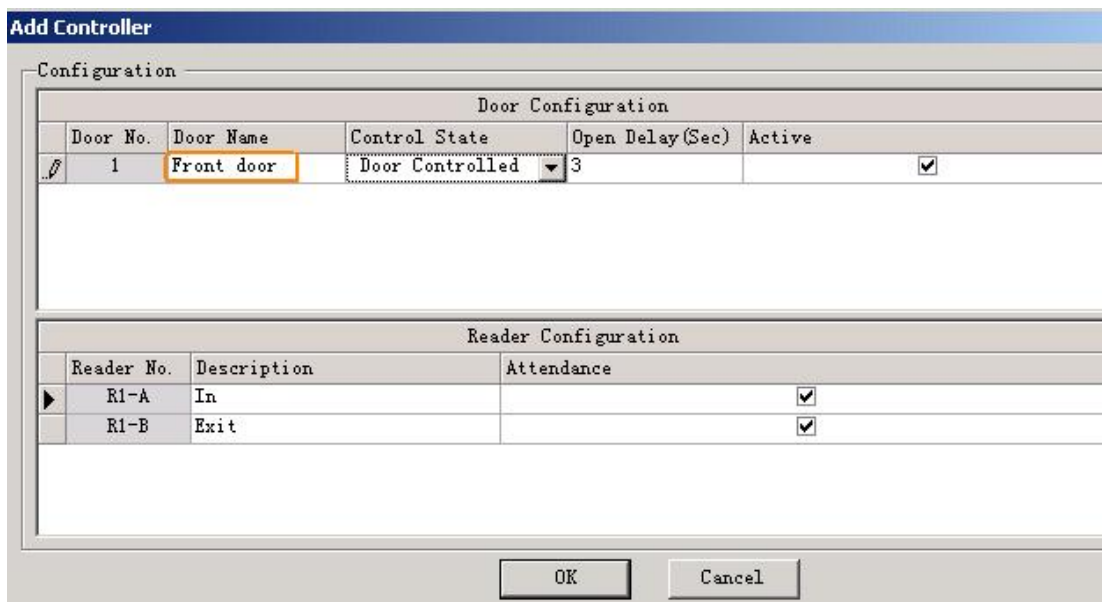

click the  to add the controllers into system.

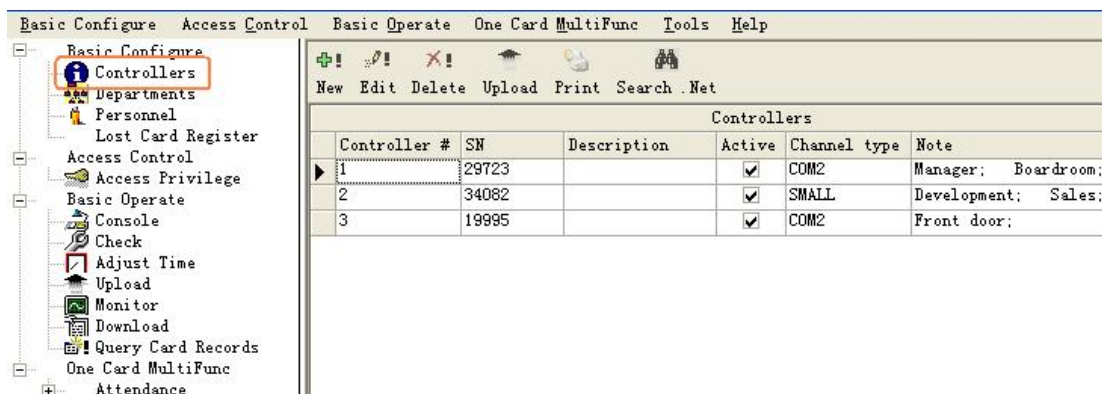

The product S/N (namely each controller serial number) may check on the PCB's label S/N:\*\*\*\*\* of the controller. please fills that five numerals.

Note: If the product S/N you fills and the PCB's label S/N:\*\*\*\*\* are different ,it will cause the software can't communicate with the controllers.

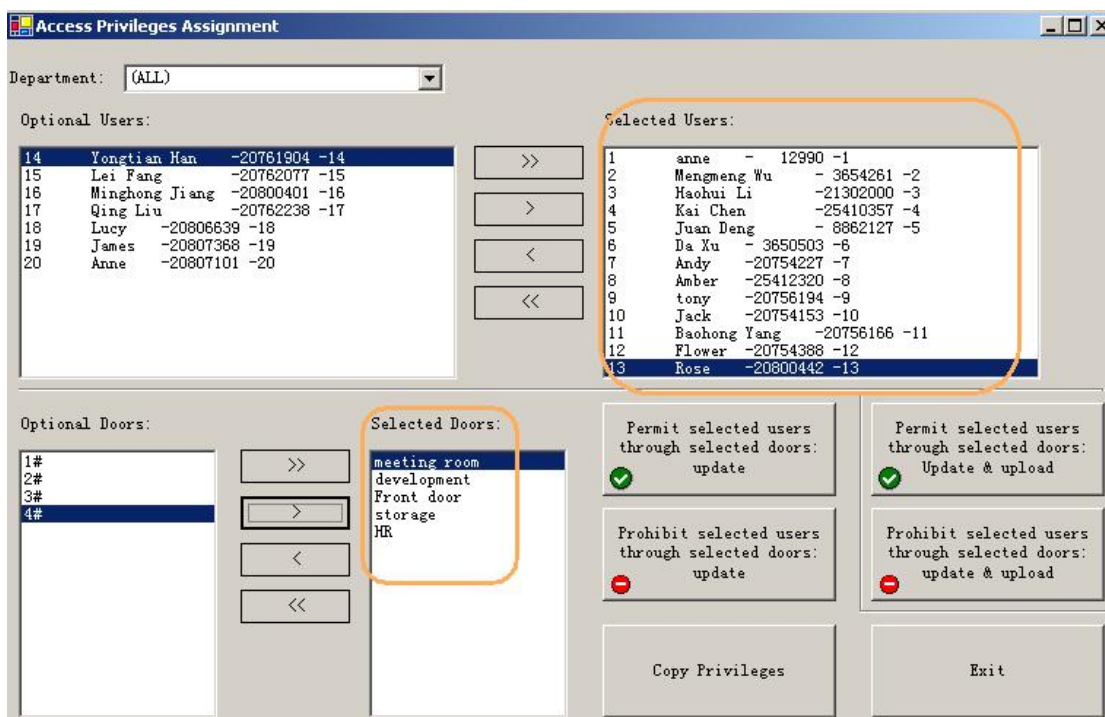

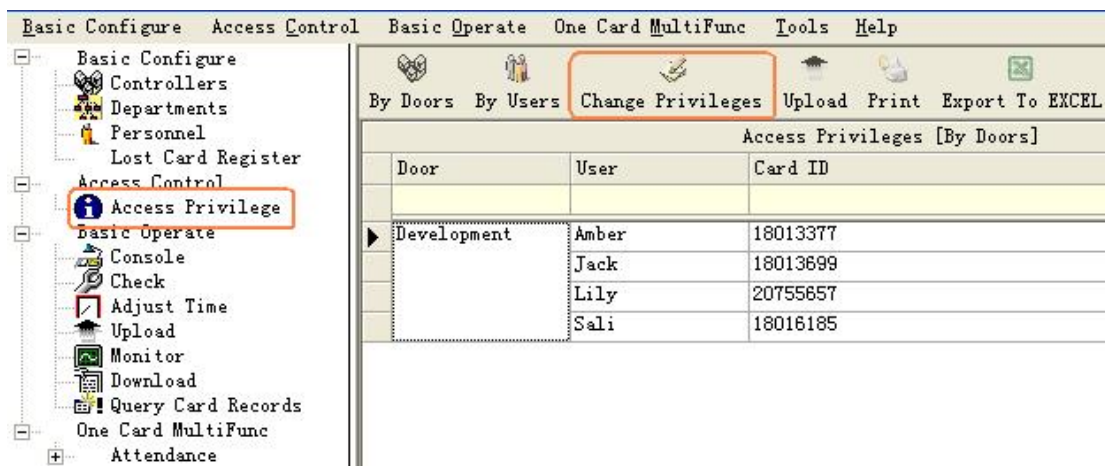

If you want to see the setting details , please consult the [Excursus](#) .

## 4.1.2 Access Privilege

Select **Access Control << Access Privilege** from the menu bar or shortcut.

After you click this button ,and then **basic operate << upload** ,the selected users can through selected doors .

After you click this button, the selected users can through selected doors .

Prohibit selected users  
through selected doors:  
update

After you click this button ,and then **basic operate << upload** ,the selected users can't through selected doors .

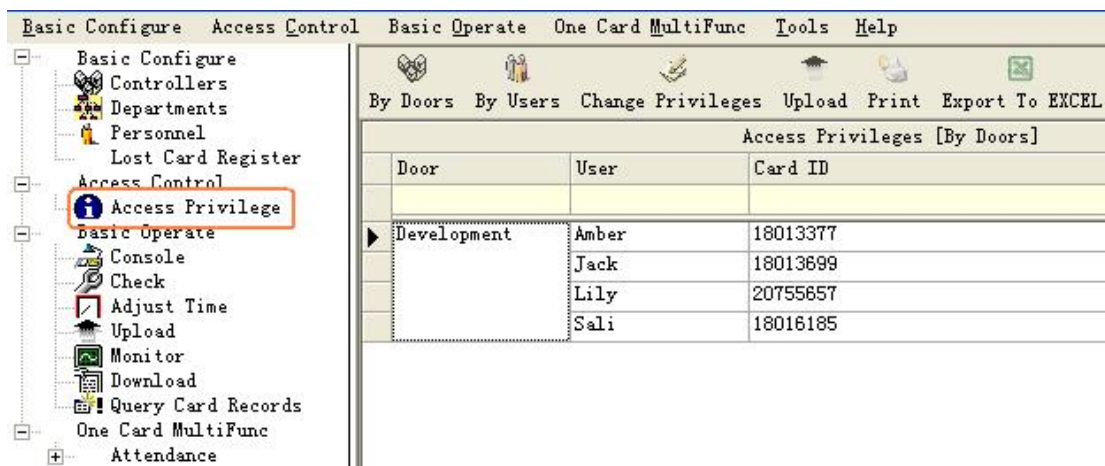

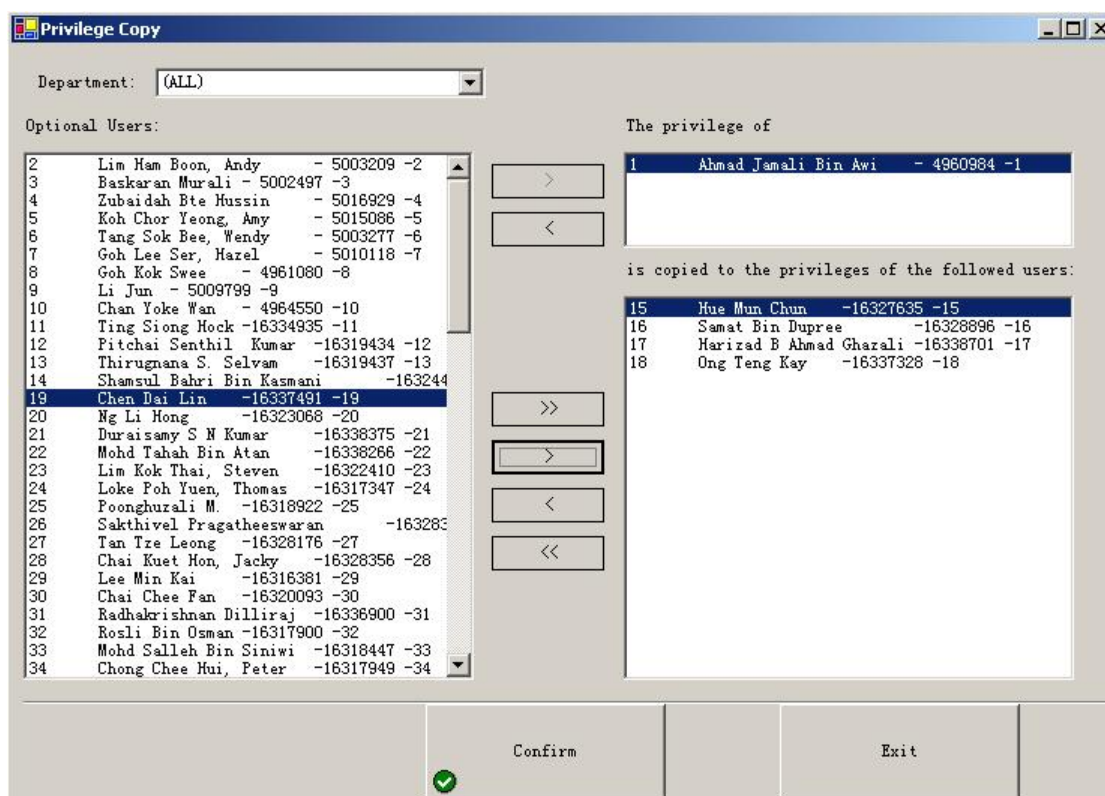

Prohibit selected users  
through selected doors:  
update & upload

After you click this button , the selected users can't through selected doors .

Copy Privileges

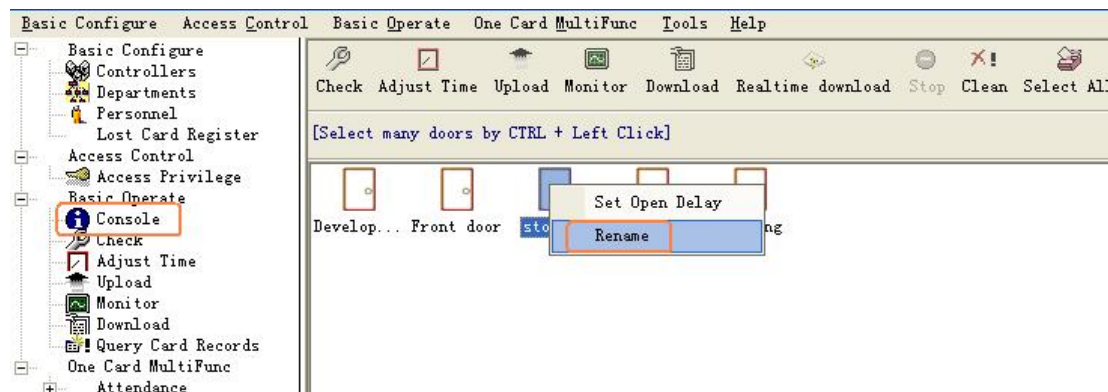

: If user A and the user B have the same privileges, we can copy user A's privileges to user B.

After you add the all privilege into the system ,you must go to the **basic operate << upload** to Upload Setting([Part 4.2.2](#)).

### 4.1.3 Rename Door

Select **Basic Operate << Console** ,

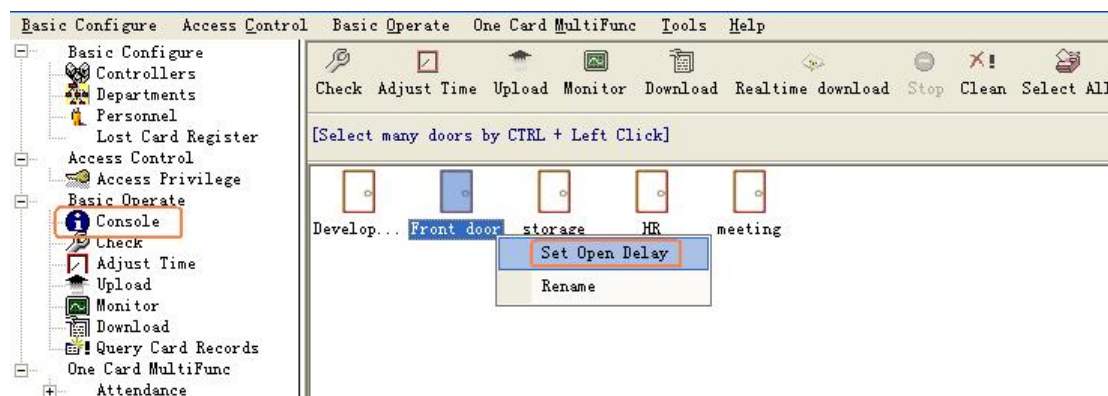

Select the door first and then Right Click pop-up menu.

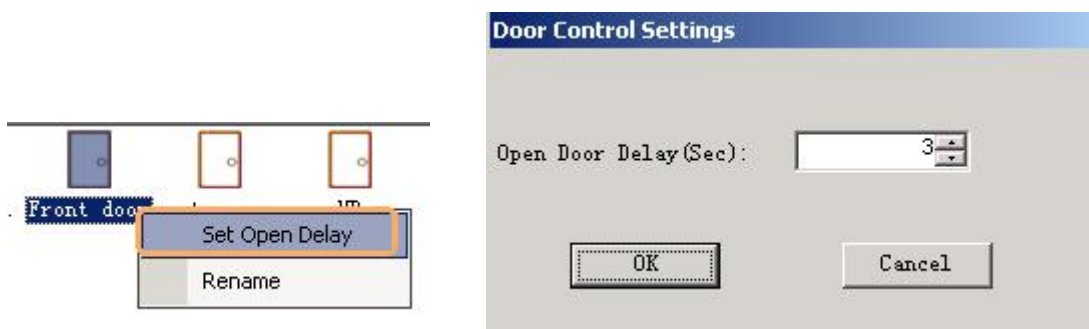

### 4.1.4 Set Open Delay

Select **Basic Operate << Console**

Select the door first and then Right Click pop-up menu.

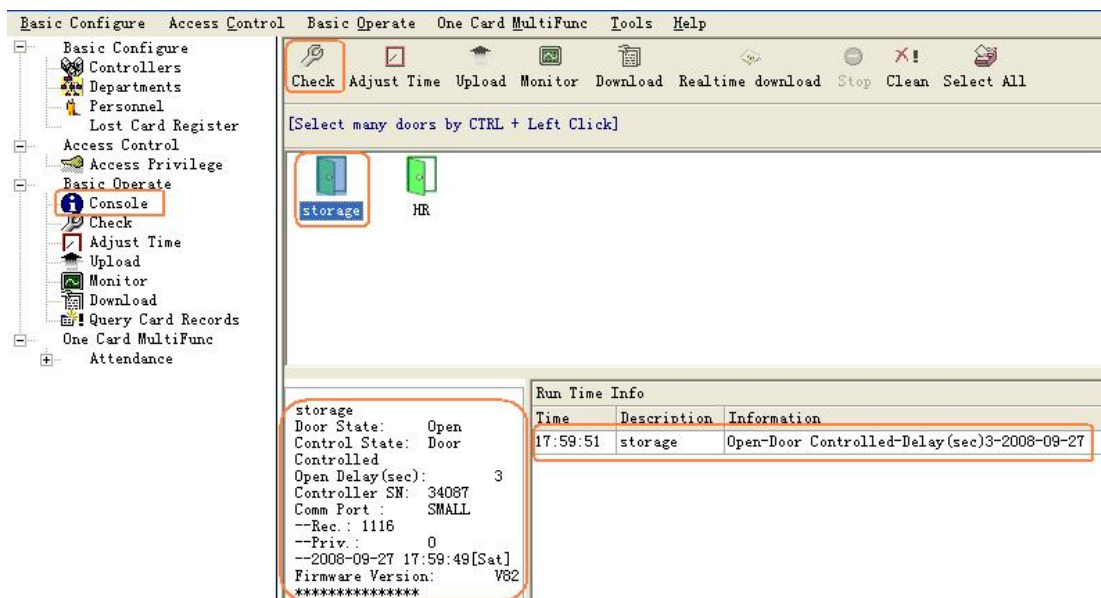

## 4.2 Basic Operate

Select **Basic Operate** << **Console** from the menu bar .The console windows contain many basic operate for controller .For example ,check info Adjust Time Upload Monitor Collect Data etc.

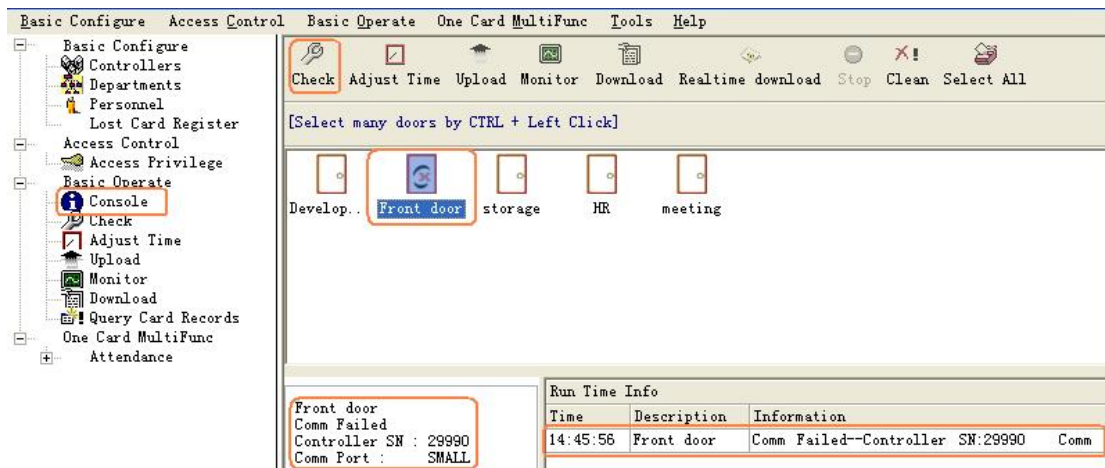

### 4.2.1 Check controller's Info

Select **Basic Operate** << **Console** from the menu bar or the shortcut of **Basic Operate** << **Check**

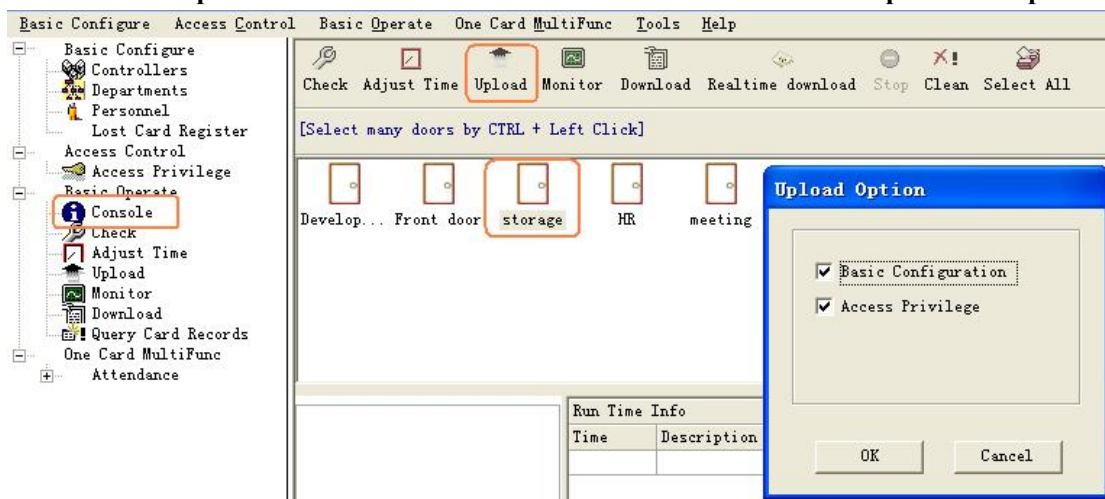

It will show the control's basic information .such as the amount of records and privileges ,door state ,control state ,open delay(sec) .If the controller is good Communicate with computer , the door label's color is green , otherwise the door label's color is red .

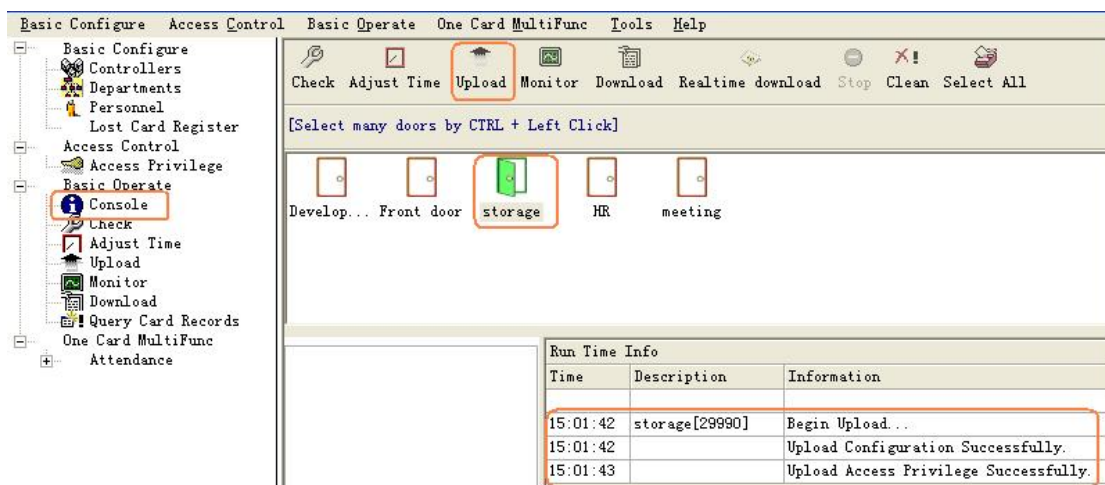

## 4.2.2 Upload Setting

Select **Basic Operate << Console** from the menu bar or shortcut of **Basic Operate << Upload**

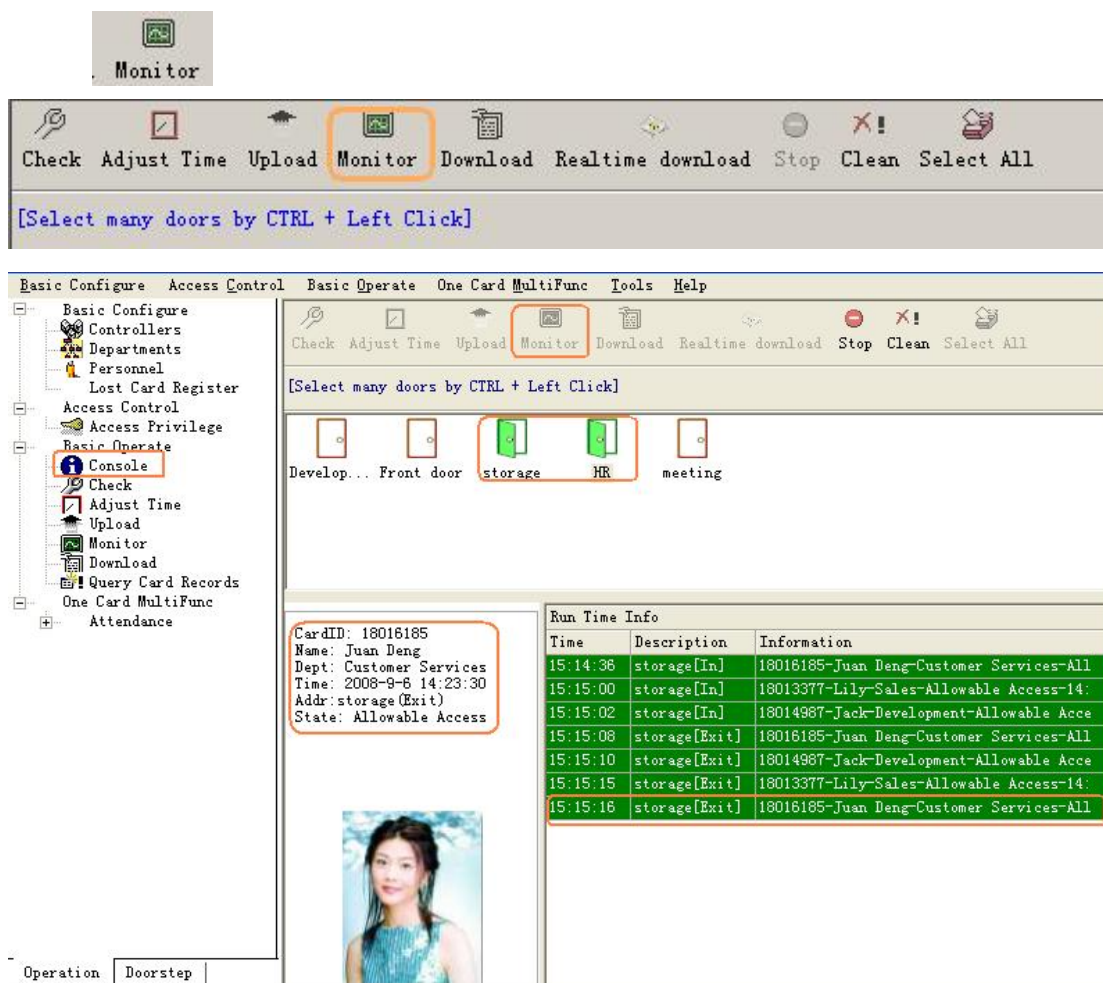

After you set the access controller's information, you must upload the database's configuration to access controllers.

## 4.2.3 Monitor

Select **Basic Operate << Console** from the menu bar or shortcut of **Basic Operate << Monitor**

Attention : how to display user's photo at Monitor

**First:** You must rename the user's photo name with his or her Card Number.

For example: the photo name is 8862127.jpg. In actual 8862127 is Card Number.

**Second:** When you adding user, the user's Card Id is the photo name just what you renamed .For example: 8862127 is the photo's name.

**User**

## Part 9 Const meal

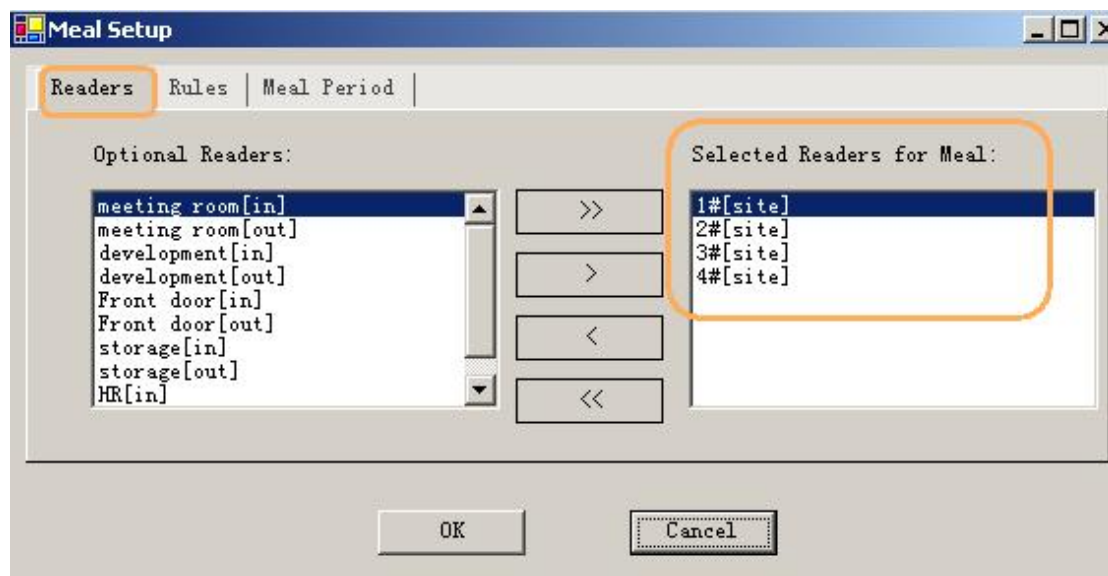

【Extended Functions】 << 【Interface】 << 【Const meal】

### 9.1 Meal setup

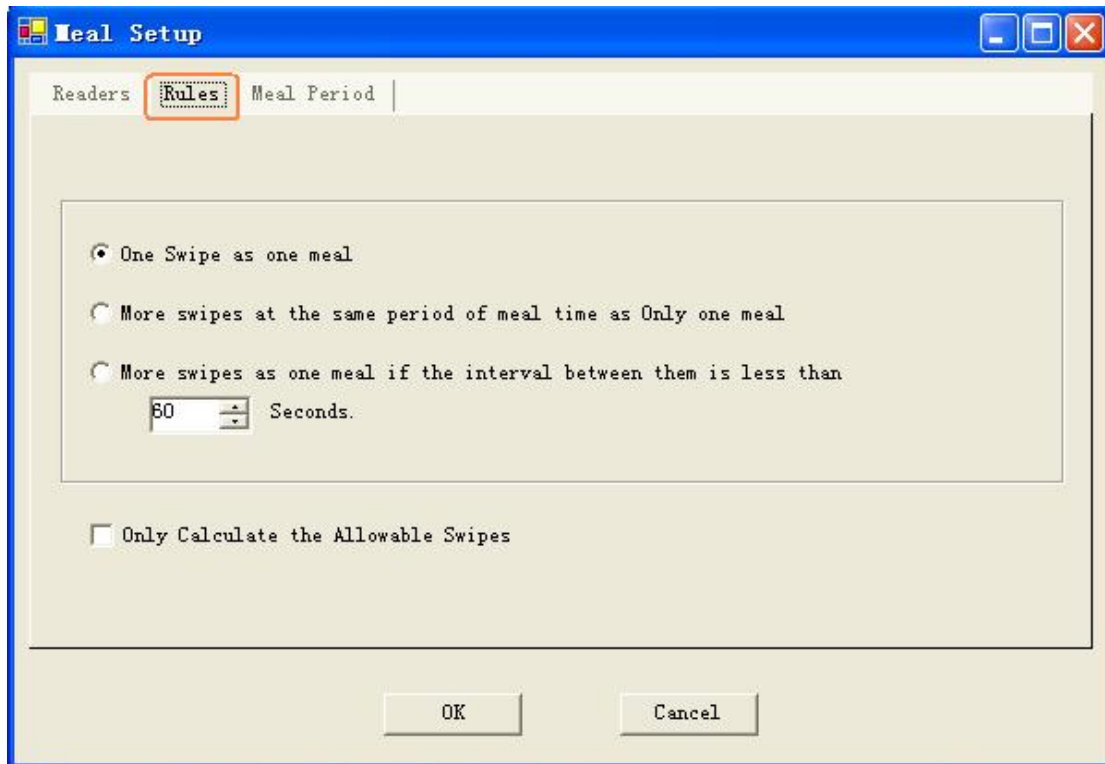

#### 9.1.1 Readers for Meal

Select Readers for Meal from Optional Readers

## 9.1.2 Meal Rules

The 'Meal Setup' dialog box is shown with the 'Rules' tab selected. The 'Readers' tab is also visible. The 'Meal Period' tab is not selected. The 'Rules' tab contains three radio button options for meal calculation and one checkbox for allowable swipes. The first option, 'One Swipe as one meal', is selected. The second option is 'More swipes at the same period of meal time as Only one meal'. The third option is 'More swipes as one meal if the interval between them is less than 60 Seconds'. The 'Only Calculate the Allowable Swipes' checkbox is unchecked. The 'OK' and 'Cancel' buttons are at the bottom.

Meal Setup

Readers Rules Meal Period

☒ One Swipe as one meal

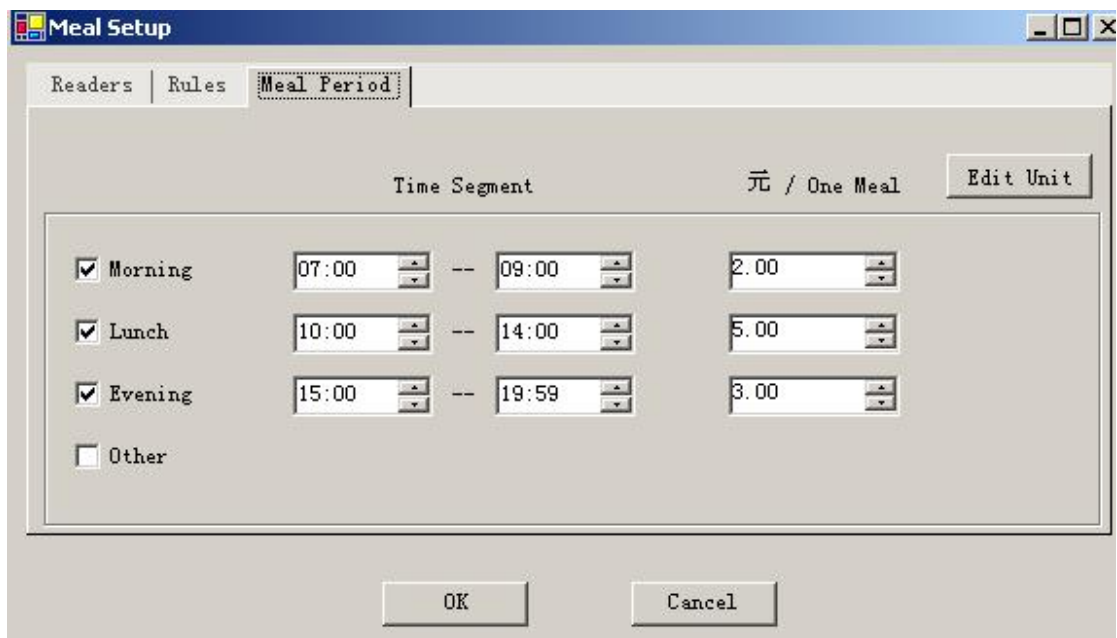

☐ More swipes at the same period of meal time as Only one meal

☐ More swipes as one meal if the interval between them is less than 60 Seconds.

☐ Only Calculate the Allowable Swipes

OK Cancel

## 9.1.3 Meal Period

The 'Meal Setup' dialog box is shown with the 'Meal Period' tab selected. The 'Readers' and 'Rules' tabs are also visible. The 'Meal Period' tab contains a table for defining meal periods. The table has columns for 'Time Segment', '元 / One Meal', and an 'Edit Unit' button. The 'Morning' period is from 07:00 to 09:00 with a cost of 2.00. The 'Lunch' period is from 10:00 to 14:00 with a cost of 5.00. The 'Evening' period is from 15:00 to 19:59 with a cost of 3.00. The 'Other' period is unchecked. The 'OK' and 'Cancel' buttons are at the bottom.

Meal Setup

Readers Rules Meal Period

	Time Segment		元 / One Meal	Edit Unit
<input checked="" type="checkbox"/> Morning	07:00	-- 09:00	2.00	
<input checked="" type="checkbox"/> Lunch	10:00	-- 14:00	5.00	
<input checked="" type="checkbox"/> Evening	15:00	-- 19:59	3.00
